

Water Efficiency Management Program

Wastewater Recycling Plant

Water Flow Measurement

Racecourse

Commercial activities typically consumes much scarce freshwater. Dunwell Engineering Co., Ltd. (DECL) is expert in water balance development and water efficiency management program. DECL could help you to define different strategies for optimizing water usage for the operations so that water needs can be met. We also provide the expertise and practical systems in the aspects of water reuse, disposal, and optimization strategy as integrated services to operation management.

Our services in Water Efficiency Management Program include:

- Water consumption auditing and analysis
- Water balance modeling
- Optimization of water use
- Identification of optimal water management practices for operational and environmental purposes
- Development of reuse and disposal strategies

Services Sectors:

- Villa
- Hotels and Resort
- Commercial Buildings
- University
- Racecourse
- Golf Course
- Water World
